A New Jersey based fulfillment center streamlines their inventory management process by implementing fully-automated Order Fulfillment solution

Overview

The client was a New Jersey based fulfillment center. Dealing with multiple customers to accommodate their inventory on a routine basis. They have various customers for inventory receiving and dispatching. Their main concern was to get automation into their system to reduce human errors and manage the overall business process through a single platform while managing the stocked inventory of each of their customers.

Challenges Encountered by the Client

- Manual Process

- Manual Record Management

- Schedule Receipts

- Record Inventory Images

- Customer Locations Tracking

- Item Traceability

- Delayed Deliveries

- Manual Billings

Streamlining Inventory Management using Order-Fulfillment

The client partnered with O2b Technologies to streamline inventory management. Using Order Fulfillment, the client resolve their end-to-end inventory management, inventory recording, and report generation challenge. This improved overall productivity and reduced operational costs.
