A New York based Bakery business streamlines their cake production, and inventory management process using Order-Fulfillment

Overview

The client was a New York based cake manufacturer. They wanted to streamline their cake production, and overall business management process as they were facing difficulties in calculating the right amount of production requirement, inventory availability and more .
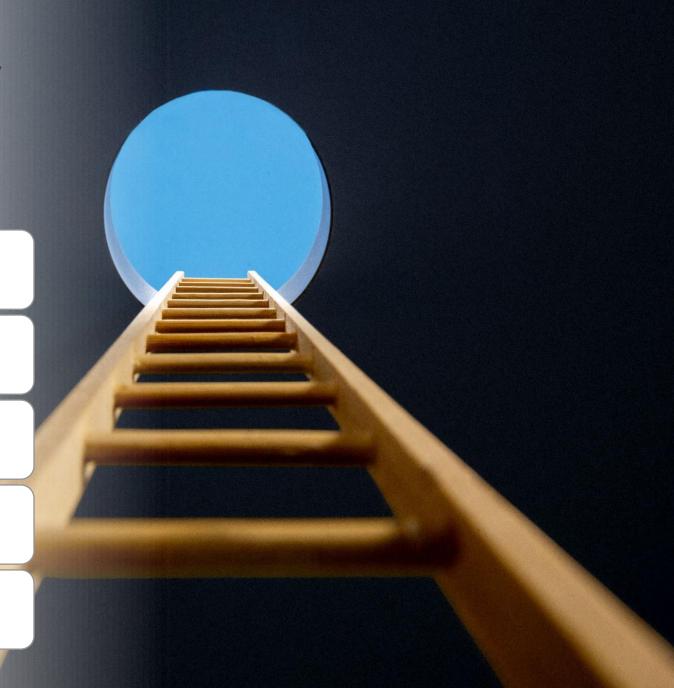

Challenges Encountered by the Client

Complex inventory storage and dispatching process.

Product delivery in sets and batches is difficult.

Maintaining accurate records for the returned inventory.

No auto-generated daily inventory report.

Delayed decisions on daily production hampering the overall business flow.

Streamlining Entire Order Fulfillment Process

The client partnered with O2b Technologies to streamline and modernize its production and inventory management. Using Order-Fulfillment solution, the client is able to handle orders efficiently and ensures on-time deliveries. Also, it enable to resolve their daily end-to-end inventory operation difficulties like inventory management, inventory recording, inventory forecasting, report generation and more. This improved overall productivity and reduced operational costs.

Solution Snapshot

Bluetooth connected barcode for both operations i.e., "IN" and "OUT"

Automated overall business operations

Automated raw material requirement planning report

Daily auto-generated inventory reports

Inventory production forecast for the production department

Key Benefits Enabled

Anytime, anywhere access to records

Extended records management capabilities

Reduced turnaround time

Better adherence to regulatory compliances

Simplified handling of incoming, outgoing, and returned inventories

Improved efficiency & Enhanced productivity
